Explosion Proof Lighting Fixtures

DGS-127L(G) | Mining Explosion Proof LED Spotlight

Use
Can be used in flammable and explosive, various indoor and outdoor locations, important camera monitoring area, sites of construction or locations with facilities and devices.

Technical Descriptions
1. High-efficiency and energy-saving: adopts American Cree LED chip, low energy consumption and long life. Life is more than 100,000 hours.
2. Enclosure is made of aluminum alloy formed by die-casting. Surface of enclosure is coated with high-voltage electrostatic powder which is corrosion proof and has high intensity.
3. Toughened glass is heat-resistant, can be able to withstand high energy impact and more than 7J impact.
4. Design with three-chamber structure, including light source chamber, electric source chamber and wiring chamber, reduces heat conduction to constant current source and ensures long-term normal work of the device.
5. All fasteners are made of 304 stainless steel, with high corrosion capability.
6. The light is not glare, soft as fluorescent light, spread from the different integrated plane of LED, has no influence on normal work.
7. Wide voltage input, immediate start, voltage fluctuation from 85~265V, light intensity is constant.
8. Special constant current source ensures constant power output. Meanwhile, it has protective functions of disconnection or short-circuit to guarantee long life and reliable working status.
9. Reliable structure makes the lamp work normally under various foul environment.
10. Design with humanized appearance. Various installation modes for selection to fulfill different requirements.
